OBJECTIVE

IT student with a foundation in Linux systems, networking, and cybersecurity tools, including experience with firewalls, packet analysis, and simulated lab environments. Actively seeking an opportunity in IT, cybersecurity, or technical support to apply and expand my practical knowledge.

EDUCATION

Kennesaw State University | Kennesaw, GA
Bachelor of Science in Cyber Security

May 2026

RELEVANT SKILLS

Languages: Python, HTML/CSS, Bash, Lua/Luau, JavaScript
Software: VMware, Hyper-V, Wireshark, Cisco ASA, NMAP, Burp Suite, Visual Studio Code, SQLite
Platforms: Linux (Kali, Ubuntu), Windows, macOS, Windows AD
Certificates: Currently studying for Security+

RELEVANT EXPERIENCE

Hack the Box Simulated Machines

- Solved a variety of Hack the Box challenges to build offensive security skills, including network reconnaissance, vulnerability exploitation, and privilege escalation.

IDS/IPS and Firewall Configuration:

- Practiced writing custom snort rules and tested them against a wide range of malicious traffic.
- Completed hands-on Cisco ASA labs via Cyberbit, gaining a better understanding of the software through the configuration of ACLs, firewall rules, and network security policies in a lab environment.

Linux/Windows SysAdmin

- Configured and managed Ubuntu and Windows systems in a virtual lab environment, this includes user account management, file permissions, and system services.
- Created Bash Scripts to assist with common administrative tasks.

WORK EXPERIENCE

Humphries Realty Group - Computer Technician - Dallas, GA

Jun. 2021 – Jun. 2023

- Manage the installation and design of computers.
- Maintenance and repair activities, including onsite repairs and replacements of parts.

Terminus Wake Park – Cable Operator – Emerson, GA

May 2024 – Jun. 2025

- Operation of the pulley system that pulls wakeboarders around the park

Domino's Pizza – Delivery Expert – Kennesaw, GA

July 2025 – Present

- Successfully pack and deliver orders to customers' doorstep.
